

HOTEL VISION Software - Description

1 BRIEF OVERVIEW ABOUT THE SOFTWARE:

The software is designed and developed to fit any Hotel Management. (Details in part 2 of this document).

The software is developed using the latest technology in designing, Development and Database data storage.

Technology used:

- VB.net 2010 using the latest components like infrajistics 2012, component one 2011 and Telerik 2012 which allow the software to be more flexible and friendly user interface.
- Data base engine SQL server 2008 which allows multi users with different privileges to access the data and read/write any specific record saved on the server and it can be accessed from one PC or other PCs through network.

Advantages:

- Save very large number of data more than 3,000,000 records
- Very fast loading and get the data
- Multi users
- Friendly user interface
- Easy to learn
- Used on different operating system(s)
- Minimal hardware requirements
- **Flexible can be updated at any time without affecting any information ***

* The update means for any new requirement nothing will affect your data, it will be appended normally. Any new update "requirement not listed in the part 2 of this document" an extra charge will be added, after both sides approval.

2 SOFTWARE STRUCTURE & MODULES

▪ Multi users

- Administrator
- Employee
- You can create from 1 admin to many
- You can create from 1 employee to many
- Each one has its own privileges
- Edit all users
 - Change password
 - Name
 - Username
- Users logging
 - Date login
 - Date log out
 - All the steps done by each user
 - Each user has its own log
- The admin can check the log for each user

▪ Clients

- List of clients
 - First name
 - Last name
 - Address
 - Company name
 - Phone number(s)
 - Car and plate number
 - Email
 - Total amount (for debit balance) – calculated automatically by the software
- Print clients in Arabic & English format
- Search by client name or client phone number... [all client's fields]
- Edit and delete any selected client it is a privilege not to all users

- **Client Account statement**
 - View all the client's statement
 - Print client's statement
 - Search by date to view any preferred transactions
 - Print client's statements
 - Show all the payments
 - Show all the reservations + Details
- **Rooms**
 - Add the rooms
 - Room number
 - Room id
 - View room's statuses
- **Color indexes**
 - Manage all the colors
 - Manage color's description
 - Used to detect the reservation and it also helps in the monthly view (details later)
 - Full automated system, the software manipulate the room's statuses following a built-in formula [it can be managed by the admin, and it is usually changed from one hotel management to another]
- **Price list**
 - Manage rooms price list
 - Daily price
 - Special price and company groups
 - Monthly price
 - The price changes corresponding the room type
 - Type of rooms
 - Family
 - Suite
 - Junior...
- **Employees / Hotel Staff**
 - Manage all the employees
 - Full info

- View each employee's transaction history
 - Penalty
 - Tips
 - Bonuses
 - Remaining balance
- Start work date
- End work date
- Status
 - Active
 - Inactive
- **Suppliers**
 - Add suppliers
 - For each supplier add its expenses
 - Print each supplier account statement (view payments, invoices, orders...)
 - Search by date
- **Reservation**
 - Reservation done by the client or by the room
 - If it is by the room an alert will remind the user to add the client info but the reservation process will be completed normally
 - Reservation to listed client
 - Reservation to a company
 - Reservation to a new client
 - Number of guests
 - Type of room
 - Check in date and time
 - Check out date and time
 - Room status (color index)
 - Days
 - Price
 - Total price (days * price)
 - Down payment
 - Auto calculated balance
 - Auto calculated refund
 - Reservation type

- Online
 - Walking
 - Guest
 - Client
- Confirmation report
- Payment type
 - Visa
 - Check
 - Cash
 - On account ...
- Submit the reservation
- **Reservation Costs**
 - New costs can be added to any reservation
 - Mini bar
 - Restaurant
 - And the total amount with description will be added to the reservation's invoice
- **Currency rate**
 - The user can add currencies and rate
- **Notes**
 - General notes added by the admin
- **Information**
 - The system shows live feed / percentage of the all room's occupancy and free rooms
- **Invoices**
 - Generate invoice
 - View and edit and re-print any selected invoice
- **Receipts**
 - Generate receipt on each payment
 - View and re-print any selected receipt
- **Closing day**
 - If the time passes 12:00am, the software will remind the user to close his day
- **Show today's records**

- Show all the income + details
- Show all the expenses + details
- Show cash, on account balance, visa balance, check balance ...
- Print sheet
- **Monthly report**
 - By room
 - By date
 - View in color index
- **Room's log**
 - View by statistical view which rooms is the most reserved
 - View each rooms reservation history
 - Print log
- **User's log**
 - View all the transactions done by the user
 - Print log
- **Summary report**
 - Select date from to
 - View all total expenses + details
 - View all total income + details
 - Estimated profit
- **Expenses**
 - Show all expenses
- **Cash Box**
 - Show all the transaction done
 - Income
 - Credit account
- **Reservation costs statistics**
 - Laundry
 - Washing machine
 - Other Variety
 - Auto calculated amount
